REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art made of record does not disclose "the first and second mating parts of the first and second main body sections being configured and arranged to be divided along an airflow direction of the air intake passage with a gas passage being formed by the first and second mating parts in the airflow direction of the air intake passage and the gas passage opening into a downstream portion of the air intake passage to supply a secondary additive gas."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. 6,752,115 issued to Fiesel et al. is a similar system. U.S. Patent Publication No. 2005/0103315 issued to Kim is a similar system showing blow by gases supplied to the engine from a channel (150) formed across the runners. U.S. Patent No. 6,807,957 issued to Ko is a similar system.
